## SUMMER'21

We love calories. The good ones at least. We're always looking for healthy ways to fuel our movement and understand that good and nutrient dense food is often highly caloric. A single tablespoon of extra virgin olive oil contains 120 calories. Half of an avocado clocks in at about 160 calories. And both foods are considered amongst the healthiest fats on the planet.

While we're huge proponents of eating lots of the good stuff, we also recognize that there may be times when monitoring caloric intake is a priority for some. If you're looking to keep things light, we've got a few suggestions.

## PRO TIPS

---

### LEMON JUICE IN LIEU OF DRESSING

Many of our dressings are made with extra virgin olive oil. Ask for a fresh squeeze of lemon juice instead.

### GREENS INSTEAD OF GRAINS

While fibrous and full of energy, grains like brown rice and quinoa (technically a seed) are also quite caloric. Substitute leafy greens like arugula, kale, or spinach in their place for a little colour.

### GO LIGHT ON THE DAIRY

We love cheese. We could eat platters of it (with a little vino of course). But we also know it can be pretty caloric. If you're looking to keep things light, hold the queso.

### DON'T GO NUTS

Nuts (and seeds) are rich in healthy monounsaturated fats, magnesium, potassium and antioxidants like vitamin E. They're also quite caloric. If you're mindful of the numbers, ask for a half portion.

All of our dressings are served on the side and are excluded from the bowl nutritional above. We'd prefer to give you more than less so you can decide how much is right for you (some like things saucy, others not so much). The amounts below are reflective of a large container of dressing. If you're looking to keep things light, opt for a few squeezes of fresh lemon or lime.
